Masterclass Workshop Story-telling

First of all we talked about our different ways to using story-telling in circus. After that we create a short lesson.

- I. Part : Entering the space.
- II. Part : Use a story to take the group into another world.
- III. Part : Warm-up with fun story like an adventure or transformation.

Explaining of each part

- I. Part : Steffano stood in the entere of our space. He told to our participants that they cant go to the circus space, if they dont have the secret movement. After some tries Steffano invite the group into a new world (the playground / gym).
- II. Part : Steffano told them they have to cross the playground in there own way to get to the circus. We created some new ways with ropes, balls and other stuff.
- III. Part : After the way across the playground / gym they arrived the circus. But that was not a normal circus, it was the secret circus where animals are the leaders of the circus and they have a special animal, a cow called Mathilda. Mathilda is a acrobatic cow with special friends and every body wants to be like Mathilda.

With Mathilda we created some acrobatic figures and other floor acrobatic movements.

That was the content of the story-telling workshop from Steffano and Martin.

Best Wishes
